Waterways	7.1 Acres
Structures	1
Drainage Ditches	11375 Feet
Diversion Terraces	5540 Feet
Farm Ponds	2
Pipeline for Livestock	542 Feet

SOIL AND WATER CONSERVATION DISTRICT PURPOSE

To develop and carry out a coordinated action program which will result in the conservation and improvement of the soil, water, woodland and wildlife resources of the Grundy County District.

WHAT YOUR DISTRICT HAS TO OFFER

Planning, design and layout of soil, water and related conservation measures (parallel terraces, grassed waterways, farm ponds, erosion control structures, diversions, land leveling, drainage, pasture improvement and management, farmstead windbreaks, recreation and wildlife measures).

Soil survey for farm planning.

Provides technical assistance for participants in the ACP program.

Conservation education program available to schools, service clubs, youth groups, and all people within the District.

HOW DO YOU RECEIVE THEIR SERVICES

Any land owner or operator may receive the services offered by the District by becoming a District cooperator. This assistance is free of charge and is in no way an obligation, other than an interest in conserving and improving the soil, water, woodland, and wildlife resources on your operating unit. Recommendations made by the District are based on the capabilities of the land. Final decisions concerning conservation needs are made by land owner.
